## Travel alert for UK – Delhi arriving passengers

**Ministry of Civil Aviation in India has released new guidance for International Arrivals into Delhi for flights originating from United Kingdom as below:**

- All passengers will be tested on arrival and passengers exiting at the arrival airport are no longer required to wait at the airport for the test result. They are permitted to proceed to their home quarantine address.
- They will remain in home quarantine for 7 days and regularly followed by the State Integrated Disease Surveillance Programme (IDSP).
- After 7 days, if the passenger tests negative, they will be released from quarantine and will need to continue to monitor their health for a further 7 day period.
- If the passenger tests positive, they will be required to quarantine in an institutional isolation facility.

Please also note:

- All passengers must undergo a mandatory RT-PCR test in the UK as well as in India. Passengers must upload their Negative RT-PCR Test report within 72 hours before departure via Self Declaration Form (SDF) on the Air Suvudha Portal <https://www.newdelhiairport.in/airsuvidha/apho-registration>. Passengers would be denied boarding if they haven't done so.
- Passengers must carry physical copies of the submitted Self Declaration Form (SDF) as it will be required on arrival at the time of submitting their test sample.

- Only passengers who have a death in the family can apply for exemption from displaying a negative test result on arrival. They can do so through the [newdelhiairport.in](https://newdelhiairport.in) portal.

### **Passengers connecting onto another destination in India**

- The transit passengers must mark that they are transiting as part of the Air Suvudha Self Declaration Form (SDF).
- These passengers will also be tested on arrival into India but must wait for their test result at their entry airport, which can take up to 6 - 8 hours. Once the test result comes as negative, they are allowed to take their onward flight.
- Once they reach their final destination, passengers can proceed directly to their home quarantine address.
- They will remain in home quarantine for 7 days and regularly followed by the State Integrated Disease Surveillance Programme (IDSP).
- After 7 days, if the passenger tests negative, they will be released from quarantine and will need to continue to monitor their health for a further 7 day period.
- If the passenger tests positive, they will be required to quarantine in an institutional isolation facility.
