Loisirs class

A more modern, spacious and bright cabin

The cabin :

- 24 rows of 5 seats (3 on the right and 2 on the left)
- 120 leather seats, 19-inches (48 cm) wide
- Adjustable head rests
- 76 cm seat pitch between each seat
- Seat recline: 115°
- Individual entertainment offer (wireless intranet): films; series; games; music; and e-readers, etc.

AIR AUSTRAL

THE MOST EFFICIENT MEDIUM-HAUL AIRCRAFT OF ITS GENERATION

THE A220 : MAXIMUM EFFICIENCY

- The A220 is a totally new aircraft design and the only one which has been specifically created for the 100 to 150-seater market
- This aircraft combines high-end aerodynamic features, innovative materials and new generation technologies and engines

- 25% less fuel consumption per seat and CO2 emissions compared to previous generation aircraft
- 25% less CO2 emissions per seat compared to previous generation small-capacity, single-aisle aircraft
- 50% reduction in noise footprint compared to previous generation aircraft
- 50% less NOx emissions than current industry standards (50% below CAEP/6 standards)

INNOVATIVE CABIN DESIGN

- The most spacious cabin in its category
- The highest ceiling in its category
- The widest economy class seats out of all single-aisle aircraft
- A wide aisle for easier passenger installation and departure
- The most spacious baggage compartments in its category: 1 two-wheeled suitcase per passenger
- Large, panoramic windows (11 x 16 inches) to let more natural light into the cabin
- LED customisable, colour-changing mood lighting to reduce tiredness upon arrival
- Toilets with improved accessibility for reduced mobility passengers

THE A220 AND ITS DESTINATIONS

Air Austral is the first French airline to add the A220-300, Airbus' latest aircraft, to its fleet. Air Austral now operates a fully modernised medium-haul fleet for more efficient service to its Indian Ocean destinations. The Airbus A220-300, an intermediary-sized aircraft, offers an improved flight experience with a quieter, more spacious cabin.
