

Air Europa increases its European destinations in high season with new routes to Athens and Alghero

- It will operate to both cities with two weekly frequencies from its Madrid hub
- During the summer, Air Europa will fly to 35 European and domestic destinations and 20 in the Americas

Madrid, May 23, 2022.- Air Europa meets the summer with the reopening of its routes to Athens and Alghero, in this way expanding its network in Europe by operating in high season a total of 35 European and domestic destinations, and another 20 in the Americas.

The airline restarts its route to Athens in June, operated by its most modern and efficient fleet, the Boeing 787 Dreamliner, which combines the highest environmental performance with maximum comfort. The airline will cover this route until the end of September and will link the Madrid hub with the Greek capital two days a week, specifically on Wednesdays and Sundays.

A month later, in July, Air Europa will inaugurate its summer destination heading to Alghero, on the island of Sardinia, where it will also fly twice a week, on Thursdays and Saturdays. Operating until the beginning of September, the route will link Madrid with this city in northwestern Sardinia with more than 30 flights.

With Athens and Alghero, Air Europa expands its presence in Europe during the summer and reinforces the expansion announced and initiated by the airline last April, which is based on a notable increase in sales since the end of last year.

Over the coming months, Air Europa will increase its offer with the incorporation of eleven new aircraft, five of them Boeing 787 Dreamliner and six Boeing 737, with which it advances in its fleet unification process that allows to increase the number of seats per plane, optimize the number of flights and increase the offer in both economy and business class. By the end of the year, the long-haul fleet will once again be the same as in 2019 and Air Europa will fly to its 23 destinations in the Americas.

About Air Europa

Air Europa is a member of the SkyTeam alliance, made up of 19 airlines that, for 19 years, have been working together as a large global network serving more than 630 million passengers a year. Air Europa's fleet is one of the most modern on the continent. It is composed of 38 aircraft whose average age does not exceed 4 years. The company is a leader in environmental conservation processes. In 2018, the German environmental organisation Atmosfair rated Air Europa as the most efficient European network airline.
